

Population Health Promotion Practitioner

About the Position:

Population health promotion practitioners at the Saskatchewan Cancer Agency work to maintain and improve the health of all Saskatchewan residents and reduce health inequities among population groups. They work with Cancer Agency staff, and provincial and national partners, to develop and advance population health promotion approaches to reduce the incidence and burden of cancer in Saskatchewan.

Population health approaches can include actions such as strengthening community health supports, building healthy public policy, and redirecting health services.

Practitioners lead, coordinate and evaluate health promotion and cancer prevention initiatives at the provincial level. They ensure cancer prevention strategies and population health promotion initiatives are evidence-based and relevant to the goals of the Population Health department.

With much of this work involving external partners and traditionally underserved populations, population health promotion practitioners require knowledge and understanding of diverse communities, and an ability to build and maintain collaborative relationships.

Job Requirements:

Education

- Master's degree in community health, health promotion or public/population health

Experience

- Three years' experience in health promotion, population/community/public health or related field

Work with us!

The Saskatchewan Cancer Agency is a provincial health-care organization dedicated to providing cancer care for the people of Saskatchewan. Our compassionate and knowledgeable team provides leadership in health promotion, early detection, treatment and research for cancer.

We run two cancer centres, the Allan Blair Cancer Centre in Regina, and the Saskatoon Cancer Centre. We also provide services in rural communities in partnership with hospitals through the Community Oncology Program.

Our vision is a healthy population free from cancer, and our more than 900 dedicated employees work hard every day towards this vision.

For the past 90 years, our teams have been leading revolutionary technologies that help make our treatments as effective as possible to help our patients live longer, fuller lives.

In 2022, the Cancer Agency received an Exemplary Standing for safety and quality from Accreditation Canada, the highest achievement a health-care organization can receive.

Note: All positions at the Saskatchewan Cancer Agency require a criminal record check.
