The Honourable Dustin Duncan
Minister of Health
Province of Saskatchewan
Legislative Building
Regina, Saskatchewan
S4S 0B3

Dear Minister Duncan:

I have the honour of submitting the Saskatchewan Cancer Agency's annual report including the audited financial statements for the fiscal year ending March 31, 2016.

The past year saw the Cancer Agency continue its focus on transforming our programs and services for better health, better care, better teams and better value, with the people of Saskatchewan at the heart of our work. This continuous growth is a reflection of our commitment to safe, high quality care, and the changing needs of communities, partners, clients, patients and their families.

In 2015-16 the Cancer Agency began a new chapter with a five-year strategic plan that outlined a clear direction for the organization. The plan builds on the strengths of our long history of delivering excellence in cancer control, while ensuring we are looking ahead. It is also a plan that acknowledges our work is not delivered in isolation, but rather together with others in the healthcare sector, in communities, government and with individuals.

As the Cancer Agency continues its work, it will look at how to use technology to improve and bring care closer to home for patients, develop strategies to engage First Nations and Métis people, include patient and family voices in our planning, and build on our efforts to develop strong frameworks in ethics and quality improvement.

As a board we are pleased to present this annual report which will highlight our progress in providing the very best in prevention and early detection programs, care, treatment and research for Saskatchewan people.

Respectfully,

Ron Waschuk, Board Chair
Saskatchewan Cancer Agency

Message from the President and Chief Executive Officer

FROM MISSION TO ACTION

"It is helpful to hear directly from people about their needs and expectations and also about their ideas to improve care, services and programs so that we can help individuals stay as healthy as possible."

-Scott Livingstone

Cancer care has changed dramatically over the years and patients are living longer with cancer than in previous decades. While this is a positive reflection of having better early detection programs, improved treatment, research and clinical trials, and more advanced technology and equipment, the fact remains that for the first time in more than 100 years, Canadian children may have shorter lifespans than their parents. In a province that is on track to reach a population of 1.2 million by 2020, having a clear plan for cancer control becomes essential if we are to sustainably meet the needs of the future.

As an organization, we have embraced the fact that we need to think beyond traditional ways of delivering healthcare and are in the process of transforming not just how we deliver care and where, but who is involved. We know that to provide the best experience and address future service and program challenges requires we work closer than ever with patients and families, residents and communities.

We are reaching out and connecting with some of the most vulnerable people in the province and asking what their greatest need is and how they want to be involved in coming up with solutions and implementing changes.

Our five-year strategic plan is the foundation for building connections. We will use this plan to take the small everyday things people do to improve and connect them together to make a big difference that will help change the health and experience of people.

This annual report highlights just a small portion of the work we have started and the direction we are taking as we look to build strong partnerships and improve how we deliver care and programs in Saskatchewan with a common vision and shared values.

Scott Livingstone
President and Chief Executive Officer

Our People, Our Work

The Saskatchewan Cancer Agency is a provincial healthcare organization with a legislated mandate to provide cancer control for the approximate 1.15 million people in the province.

Together, our more than 840 employees provide clients, patients and families with safe, high quality treatment, innovative research, and early detection and prevention programs. As we look to continuously improve our delivery of programs and services, our employees are rising to the challenge.

The Cancer Agency is subject to or governed by the following provincial legislation:

- *The Cancer Agency Act*
- *The Health Information Protection Act*
- *The Regional Health Services Act*

TREATMENT

Through the Allan Blair Cancer Centre in Regina and the Saskatoon Cancer Centre, patients have a team of experienced, skilled and dedicated health professionals helping them to understand their diagnosis and make choices on treatment and care.

Each cancer centre offers:

- Psychosocial workers to help patients and families cope with the physical, financial and emotional impact of dealing with cancer
- A referral centre, operated by registered nurses, that processes new referrals and books patients for assessment
- Chemotherapy and radiation therapy
- Through the Blood and Marrow Transplant Program, located in Saskatoon, we provide assessments and treatment for patients with aggressive or advanced blood and circulatory system cancers

COMMUNITY ONCOLOGY PROGRAM OF SASKATCHEWAN

We recognize the importance that family and community play in a patient's treatment and recovery. The Community Oncology Program of Saskatchewan (COPS) works together with health regions to provide specific types of chemotherapy treatments. COPS provides cancer patients with care, treatment and support in or closer to their home communities. There are 16 COPS centres located in hospitals throughout Saskatchewan (Estevan, Humboldt, Kindersley, Lloydminster, Meadow Lake, Melfort, Melville, Moose Jaw, Moosomin, Nipawin, North Battleford, Prince Albert, Swift Current, Tisdale, Weyburn and Yorkton).

RESEARCH

At the Cancer Agency we have world-class researchers who are helping make a difference in the fight against cancer. We provide bench research, clinical research, including clinical trials, and epidemiology research.

Understanding how breast cancer develops and why it spreads is a key focus of the Cancer Agency's research team as they look to help improve care, programs and treatment options.

Our vision:

- *A healthy population free from cancer*

Our mission:

- *To provide leadership in health promotion, early detection, treatment and research for cancer*

Our values:

- *Courage*
- *Integrity*
- *Vision Driven*
- *Innovation*
- *Collaboration*

Our People, Our Work

EARLY DETECTION

The Cancer Agency operates three population-based screening programs:

- Screening Program for Breast Cancer, which started in 1990, includes clinics in Regina and Saskatoon and satellite centres in Lloydminster, Moose Jaw, North Battleford, Prince Albert, Swift Current and Yorkton. We also operate a mobile unit that travels to rural Saskatchewan and First Nations reserves offering screening mammograms.
- Prevention Program for Cervical Cancer, started in 2003
- Screening Program for Colorectal Cancer, started in 2009

PREVENTION

Through connections with communities, organizations and government ministries the Cancer Agency provides information and education with regard to cancer prevention. Since many risk factors for cancer are common to other diseases, the probable economic and human life savings is significantly greater than that for cancer alone. By controlling these risk factors there would also be a positive impact on the occurrence of heart disease and stroke, lung disease and diabetes. Creating an environment that helps address the social determinants of health can also help protect against disease by creating awareness.

PATIENT AND FAMILY ADVISORY COUNCIL

At the Cancer Agency we want to provide exceptional care with the client, patient and their family at the centre of every decision we make and action we take. This starts with ensuring patients and their families have a voice about their care and treatment, but also about how services are delivered.

In 2011, we established a Patient and Family Advisory Council (PFAC) with patients, family members and our own staff coming together to:

- Improve the patient and family experience
- Improve the relationship between patients, family and staff
- Channel information, ideas and needs of patients
- Provide input into services and programs

FUNDRAISING

Philanthropy plays a vital role in the success of our work. The support of our donors enables us to:

- Equip our facilities with the most advanced technology to save lives and improve patient care
- Care for the needs of people from early detection through to treatment
- Fund research that benefits patients and advances our understanding of disease prevention, diagnosis and treatment
- Maintain high levels of quality and satisfaction for patients and employees
- Improve our facilities so we can deliver advanced, efficient care to patients who come through our doors

Accountability

BOARD OF DIRECTORS

The Cancer Agency is guided by a board of directors appointed by the Lieutenant Governor in Council. The responsibilities of the board include:

- Selecting the chief executive officer and reviewing his or her performance
- Establishing the overall strategic direction and framework for the Cancer Agency, including the mission, vision and values
- Providing financial stewardship by overseeing the financial management of the organization
- Monitoring the overall quality and safety of services and programs for staff and patients
- Establishing and maintaining relationships with key stakeholders
- Maintaining effective governance, which includes annually evaluating the board's effectiveness and that of its committees

The president and chief executive officer (CEO) is the board's link to the administration and day-to-day operations of the Cancer Agency. The CEO is accountable to the board as a whole.

"The board's role is supported by the organization's statutory framework, and by the board's own governance manual and oversight," said Ron Waschuk, Cancer Agency Board Chair.

As overseers of a \$163.4 million operating budget, as well as capital, research and trust fund budgets, the board brings strong business judgement and expertise to the stewardship of the Cancer Agency. To be successful for such a large and at times complex organization, board members devote a considerable amount of time to meetings and committee work. All of the board's members sit on committees that are designed to help strengthen the Cancer Agency's accountability to the people of this province.

BOARD ACCOMPLISHMENTS FOR 2015-16

"Strong governance is the foundational starting point for our board," said Ron Waschuk. "All of our members are on the same page around their responsibilities and share a similar vision for the Cancer Agency."

- **Strategic Planning:** The board affirmed its role in oversight of the strategic planning process for the Cancer Agency and engaged with the leadership of the organization to establish a five-year plan with a new set of values. The board also attended quarterly reviews to hear the progress being made on each of the initiatives selected to advance the goals of the Cancer Agency.
- **Governance:** With an Accreditation Canada on-site survey for the Cancer Agency set for April of 2016, the board completed a critical review of all governance standards and attended information sessions about the accreditation process.
- **Patient and Family-Centred Care:** By inviting patients to share their experiences at board meetings, the board continued its commitment to ensuring that patients and their families are the focus of the Cancer Agency's work. The board also took a more proactive role in hearing the patient voice by attending meetings of the Patient and Family Advisory Council.

"Good governance is essential in ensuring the Cancer Agency continues to serve Saskatchewan residents in an effective, sustainable and accountable manner."

*–Ron Waschuk,
Board Chair*

Accountability

BOARD COMMITTEES

Audit:

- Howard Crofts, Chair
- Doug Finnie
- Ron Waschuk, Ex-officio

Governance and Human Resources:

- Doug Finnie, Chair
- Howard Crofts
- Don Ravis
- Ron Waschuk, Ex-officio

Quality, Safety and Risk:

- Dr. Walter Streelasky, Chair
- Don Ravis
- Zeba Ahmad
- Ron Waschuk, Ex-officio

A brief bio of our board members is available at www.saskcancer.ca/board

- **Quality Safety and Risk:** The board enhanced its capabilities in providing oversight in the areas of quality, safety and risk by using learning modules based on the Canadian Patient Safety Institute best practices related to quality governance for boards.
- **Financial Reporting and Sustainability:** The board amended the audit and finance committee charter and participated in a new system-wide financial reporting protocol for boards. The new protocols further improved the board's ability to provide oversight and guidance on matters of financial performance, stability and sustainability.

Consideration of future sustainability and enhancement of care is an important element in the governance oversight of the board. With this in mind, the board encouraged the Agency to seek out a consultant to provide an assessment of fundraising environments internally and externally and to make recommendations on the best options to move forward.

Strategic Direction

FROM VISION TO ACTION

In May of 2015, the Saskatchewan Cancer Agency rolled out its new five-year strategic plan and values. Guided by four strategic directions, the multi-year plan informs our delivery of care, services, research and programs and ensures our continued commitment to quality, safety and improvement. Underlying our goals and helping move us from vision to action is our strong desire to put people first—clients, patients, families, and staff.

“Everyone, at every level of the organization, needs to understand they play an important role in supporting the plan’s goals and strategic initiatives,” said Scott Livingstone President and CEO, Saskatchewan Cancer Agency. “Having a clear direction and being accountable for accomplishing what we set out to do is what will help take us from good to great.”

Saskatchewan Cancer Agency Strategic Direction 2015-2020

Strategic Direction

Significant progress was made on initiatives in year one of the plan:

Strategies	Goals	Initiatives 2015-16	Progress
Better Teams	Leadership/ Talent	Develop and begin implementing a comprehensive integrated talent management system	<ul style="list-style-type: none"> Redesigned the performance review process and began implementing development planning that incorporates a coaching approach Identified components necessary to establish a comprehensive and integrated talent management system Focus on leadership development with various strategies and tools provided to assist leaders in their work
	Engagement	Plan and implement staff engagement strategy	<ul style="list-style-type: none"> Four key areas were identified by employees to improve engagement (senior leadership, recognition, performance development, resources) Established cross functional working groups related to recognition and onboarding Developed and implemented a semi-annual snapshot survey to capture staff perspectives and to measure progress

Strategies	Goals	Initiatives 2015-16	Progress
Better Care	Accessibility	Access improvement strategy	<ul style="list-style-type: none"> Primary drivers for access to services were clearly identified Standardized referral process, physician human resource in medical oncology and space development identified as priorities Completed internal stakeholder consultation on standardized referral forms, and a space redevelopment plan is near completion
		Service delivery plan (clinical trial participation rate plan, radiation oncology and systemic oncology service delivery plan)	<ul style="list-style-type: none"> Completed focus group sessions with senior leadership and managers and identified common themes for planning Established a steering committee to further advance the work in consecutive years
		Development and implementation of a prostate high dose radiation (HDR) brachytherapy program	<ul style="list-style-type: none"> Program started in May 2015 and 40 patients were treated using HDR
		Develop and implement an intracranial radiosurgery program	<ul style="list-style-type: none"> The program was available starting in March 2016 and one patient was treated
		Develop a molecular oncology strategy	<ul style="list-style-type: none"> Continued collaboration with health regions to introduce molecular testing to support oncology diagnosis and treatment

Strategic Direction

Strategies	Goals	Initiatives 2015-16	Progress
Better Care (cont'd)	Treatment Programs	Patient reported outcomes program	<ul style="list-style-type: none"> • Electronic reports created to identify areas of unmet patient need (partial completion) • Fatigue strategy being built and implemented • Developed implementation plan for pain/symptom management clinic • Electronic tool modified and finalized to reduce clinician burden and reports of screening data are available • Registered nurses and radiation therapists screening new patients and second treatment patients
		Develop information management systems	<ul style="list-style-type: none"> • Clinical management system (CMS) roadmap completed and steering and working groups set up to help: <ul style="list-style-type: none"> ◦ Put decision making and priority setting in the hands of those delivering patient care by creating a steering committee comprised of department heads and working groups that include front line staff ◦ Ensure data will be captured as discreet elements wherever possible and appropriate integration of data from CMS, Registry and screening is accessible to measure treatment program effectiveness and is available for cancer research ◦ Ensure that the IT infrastructure is in place to support a fully electronic patient chart and sharing of information with the Provincial Electronic Health Record (EHR) for access by clinicians outside of the Cancer Agency that provide care to our patients ◦ Protect our patients' personal health information by ensuring compliance with <i>The Health Information Protection Act (HIPA)</i> for access and disclosure of information
		Develop clinical minimum data sets	<ul style="list-style-type: none"> • Basic work on the initiative is nearly complete and will continue with IT to look at implementation in Aria medical oncology: 60% completed for solid tumour sites, one site in gyne-oncology, one site for hematology and one for pediatrics
		Pediatric oncology program model	<ul style="list-style-type: none"> • Completed review of pediatric oncology program by external consultant • Received draft recommendations which will be reviewed and validated
		Pharmacy system replacement	<ul style="list-style-type: none"> • Deferred due to vendor issues
		Take home cancer drug program	<ul style="list-style-type: none"> • Deferred as other work is required first before implementation

Strategic Direction

Strategies	Goals	Initiatives 2015-16	Progress
Better Value	Sustainability	Participation in 3sHealth initiatives	<ul style="list-style-type: none"> Participated in three key initiatives of 3sHealth: <ul style="list-style-type: none"> Linen services were transferred to a new provincial provider and standard work was implemented by nursing and radiation therapists Smart pumps to be implemented across the province in 2016, alongside the work taking place to develop the provincial oncology drug library Transcription services will be managed provincially and the Cancer Agency has identified the voice recognition software needed for our work
		Develop multi-year capital plan	<ul style="list-style-type: none"> Completed the lease versus buy component of the initiative Completed work on the service contract component with implementation in 2016
	Continuous Improvement	Accreditation review	<ul style="list-style-type: none"> Worked with all leaders and departments to ensure they were informed about the Accreditation Canada process and that working teams were formed to address outstanding issues
		Continuous improvement training/ applying Lean tools	<ul style="list-style-type: none"> 20% of departments are set up with stronger daily visual management practices 38% of managers trained in Lean 95% of all staff trained in Kaizen Basics 100% of last five rapid process improvement workshops have sustained their audited gains
		Develop an enterprise risk management system (ERM)	<ul style="list-style-type: none"> Developed ERM framework document Initiated ERM education sessions for staff Updated unusual occurrence reporting and critical incident policies

Strategic Direction

Strategies	Goals	Initiatives 2015-16	Progress
Better Value (cont'd)	Investment	Create a fund development strategy	<ul style="list-style-type: none"> • Engaged internal and external stakeholders in a review and assessment of fundraising and received a final report with recommendations for approval
		Plan for short, medium and long-term infrastructure requirements	<ul style="list-style-type: none"> • Linac in Regina: <ul style="list-style-type: none"> ◦ Retrofitted a low energy bunker to a high energy bunker ◦ Renovations taking place in the bunker and on the roof • Saskatoon Cancer Centre redevelopment <ul style="list-style-type: none"> ◦ A high level plan has been developed for moving all of chemotherapy to one floor • University Heights (Saskatoon) redevelopment <ul style="list-style-type: none"> ◦ Developed a high level plan to move the Screening Program for Breast Cancer to this location along with other departments • Harbour Landing (Regina) project <ul style="list-style-type: none"> ◦ Consolidated five office locations, including the early detection programs for breast, cervical and colorectal, into two floors of a single office space with additional meeting and video conference rooms for better flow of information

Strategic Direction

Strategies	Goals	Initiatives 2015-16	Progress
Better Health	Health Promotion	Saskatchewan Alliance for Youth and Community Well-being (SAYCW) youth health survey	<ul style="list-style-type: none"> Survey reach >110 schools >9000 students across 18 school divisions or authorities in 10 health regions Developed knowledge translation strategy and toolkits (available online for nutrition, tobacco and mental health) Developed an evaluation report (SAYCW first cycle) Developing processes for school grants and third party SAYCW data access
	Early Detection	Fully implement navigation for the Screening Program for Colorectal Cancer	<ul style="list-style-type: none"> Full navigation expanded to Sun Country Health Region
		Establish endoscopy standards for fecal immunochemical test-(FIT) positive clients and provide reports on the quality indicators to each health region	<ul style="list-style-type: none"> Documentation of adenoma detection rates (ADR) per endoscopist (ADR is single most important quality indicator for colonoscopy) Participation rates – programmatic and opportunistic >50% (best in Canada in population health studies) Senior medical officers credentialing of endoscopists consistent with Screening Program for Colorectal Cancer policies
Research	Provincial cancer research plan	<ul style="list-style-type: none"> Conducted research request satisfaction survey Prepared environmental scan of data request processes used in other jurisdictions Conducted survey to assess how Agency staff perceive and define research and the types of supports currently used/desired Setup data use and research facilitation committee Developed a preliminary research and data request procedure 	

The Heart of Our Work

PATIENT AND FAMILY ADVISORY COUNCIL

People are at the heart of the work of the Saskatchewan Cancer Agency—clients who come to us for screening, patients and their families whom we care for, and residents whose overall health we want to help improve.

“We are always trying to do more to improve not just the health of people but their overall healthcare experience,” Livingstone said. “We want there to be a true partnership in which patients, clients and families feel that they have a voice and a role to play that is equal to our staff.”

Starting with patient stories at our board meetings, to patient and client representatives on continuous improvement activities, to the overall work of the Patient and Family Advisory Council (PFAC), the Cancer Agency is finding ways to include people in its work.

During 2015-16, the Cancer Agency’s PFAC played an important role in helping to facilitate several improvements to signage both within and outside our cancer centres. In Saskatoon, signage was installed between the Royal University Hospital and the cancer centre to help patients navigate between facilities. Signage was also added to College Drive to help guide patients. This required the City of Saskatoon to install signage on the street leading into the facility.

“Our Patient and Family Advisory Council was instrumental in getting the signage in place by writing to the city to express their needs for better street directions. Empowering patients in this way is a significant change to how we conduct business today from even five years ago; and it’s a change for the better,” Livingstone said.

PFAC members also participated in five rapid process improvement workshops and redevelopment work taking place at the Saskatoon Cancer Centre helping to ensure we were meeting not just staff needs but have taken the patient perspective into consideration as well.

During the year PFAC also began work on a team charter. The charter will reflect the desire for blended goals and responsibilities for patients/clients, family and staff as we work together on cancer control.

“Having patients and families involved in our work as a Cancer Agency makes us stronger. We truly see ourselves as partners in care and want clients, patients and families to embrace this idea.”

–Scott Livingstone

The Heart of Our Work

BETTER HEALTH

Early Detection

Monitoring the health of people in Saskatchewan and working towards a healthy population free from cancer is an important aspect of the Cancer Agency's work.

"We know if we can find cancer early the outcome for patients and families is better," Livingstone stressed. "But if you can actually change the trajectory of the disease through primary prevention you are making a significant investment in building healthy people and communities."

The Cancer Agency reached several milestones on its road to excellence in early detection and cancer screening. The first was celebrating the 25th anniversary of the start to the Screening Program for Breast Cancer. Approximately 75 per cent of breast cancers diagnosed through the screening program are early stage and on average 200 cancers are diagnosed through the program annually.

"Screening and early detection is one of the best defences against cancer for women," Livingstone said. "I'm proud of our long history of breast cancer screening and of reaching this milestone of 25 years of helping save lives."

Over the last 25 years 828,800 mammograms have been performed through the Screening Program for Breast Cancer.

The second key milestone was achieving an overall participation rate of 50 per cent in the Screening Program for Colorectal Cancer. As an organization we lead the country in participation rates for a population-based colorectal screening program.

Between April 2014 and March 2016 more than 154,000 people had participated in the Screening Program for Colorectal Cancer.

"Working closely with the health regions, the provincial laboratory and healthcare professionals to deliver the screening program has been essential to our success. We have very much adopted a team approach and together we are making a difference."

Primary Prevention--Partnerships

While early detection is important in cancer control, to truly make a difference the Cancer Agency continues to work on primary prevention.

"While much of this work is done in partnership, our organization is often leading or providing the resources to make it successful," said Livingstone.

In 2015-16, the Cancer Agency continued its work with Sun Smart Saskatchewan raising awareness through a social marketing campaign called Skip the Base Tan. It also provided much needed training for 80 early childhood educators and sun safety resources for 50 outdoor lifeguards.

Visit www.sunsmarts.sk.ca for more information

The Heart of Our Work

“Given that skin cancer is highly preventable, but also a leading cause of cancer, this work is just one step we can take to ensure that Saskatchewan residents are aware of the hazards of tanning. We were also pleased to see that the province recognized the need for intervention and put in place regulations to ban tanning bed use by individuals under the age of 18.”

“This step will help to protect youth from the health risks associated with indoor tanning,” Health Minister Dustin Duncan said in a news release in September 2015. “The regulations represent a workable, practical approach to this issue.”

Caring for youth is important and working with the Saskatchewan Alliance for Youth and Community Well-being (SAYCW) allows the Cancer Agency to assist the work of government, communities, individuals and organizations. To ensure we are focusing the resources in the right areas, SAYCW conducted a survey for Saskatchewan students in grades 7 to 12.

“Using the results of the survey everyone can work together with schools, school divisions and communities to deliver programs and develop policies that can help improve youth health,” Livingstone said. “This is significant for cancer control, but also its something that every parent wants—healthy children.”

Over 9,000 students from more than 100 schools across 18 school divisions/authorities and 10 health regions participated in the first cycle of the SAYCW Youth Health Survey between March and December 2015.

BETTER TEAMS

Building Relationships

While patients may initially receive treatment in one of our two cancer centres, they are part of a much larger healthcare system and community caring for them. From general practitioners to specialists, from surgeons to oncologists, our patients at the Cancer Agency are the patients of everyone who plays a role in helping them with their care.

“Having a strong system of care doesn’t start with the Cancer Agency, but rather with strong health regions, which we see as our partners in delivering programs and services,” Livingstone said. “Building strong partnerships in all aspects of our work is vital to our success as an organization.”

One of the Cancer Agency’s key partnerships to advance cancer control over the last two years has been with First Nations and Métis communities. This three-year initiative funded by the Canadian Partnership Against Cancer is part of the larger action plan for First Nations, Inuit and Métis people in Canada.

Working together with English River First Nation Health Clinic, Ochapowace First Nation, Battle River Treaty 6 Health Centre, northern village of Pinehouse and the northern village of Île-à-la-Crosse we have been able to understand the current state of cancer care for rural and remote First Nation and Métis patients in Saskatchewan.

The partnerships have helped the Cancer Agency to develop a framework for a cancer surveillance system, which will be piloted over the next year.

The Heart of Our Work

Donors As Partners in Care

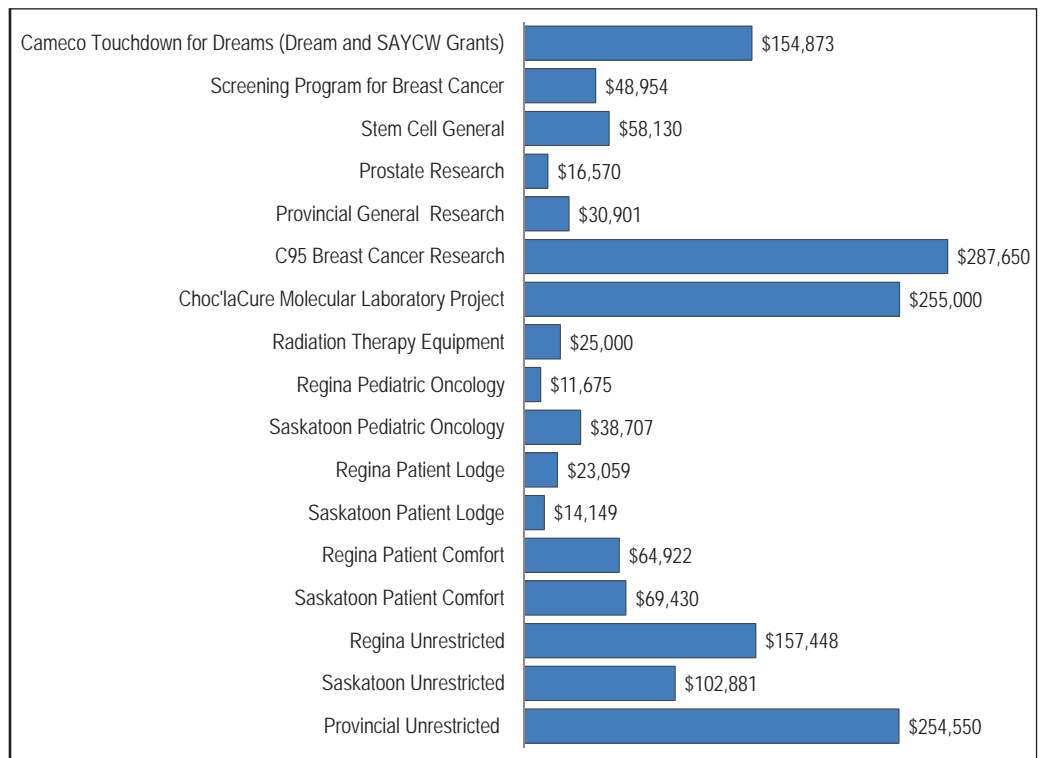

“It’s inspiring that people in this province want to be a part of our work,” Livingstone said. “Individual donors and those who raise funds through events are all part of our team in providing care and programs for Saskatchewan people.”

From Wyatt Miller, a 16-year-old 4-H member in Grandora who raised over \$40,000 by cutting his hair and selling his Simmental steer, to Prairie Women On Snowmobiles who travelled 1,800 kms in Saskatchewan to raise more than \$36,000, people in this province are engaged in helping the Saskatchewan Cancer Agency.

Prairie Women On Snowmobiles

This year funds were received for:

BETTER CARE

Prostate Treatment and Stereotactic Radiation Therapy —Bringing Care Closer to Home

Over the last year, the Cancer Agency focused efforts on programs that would allow patients to receive treatment closer to home. Starting in May 2015, the first prostate high dose (HDR) brachytherapy treatment was delivered in the province for the first time in approximately 10 years. This treatment is rapidly becoming the standard of care for men with intermediate to high-risk prostate cancer. It can be delivered in a shorter time frame with better outcomes for patients than external beam radiation therapy alone.

The Heart of Our Work

“This was a true team effort with staff from several departments coming together to deliver patient and family-centred care,” Livingstone explained. “The biggest success of this initiative is the fact that patients within Saskatchewan no longer have to leave the province for treatment.”

During the year, 40 patients were treated with HDR brachytherapy.

The second initiative that we made significant progress on in 2015-16 was toward implementing an intracranial stereotactic radiosurgery (SRS) program, which began in March 2016. SRS is a technique that delivers a high dose of precisely targeted radiation using highly focused beams to a specific area of the brain to treat a tumour while minimizing the radiation effect on the surrounding normal brain tissue. Currently one patient has been treated using SRS. Annually approximately 30 patients who would have needed to receive treatment outside of Saskatchewan will now have the opportunity for care in Saskatoon.

Telehealth

Additionally, to reduce the amount of time patients and families spent travelling, the Cancer Agency increased its use of Telehealth. Using secure video conferencing equipment, Telehealth enables a remote patient to ‘visit’ an out-of-town healthcare provider from their home community without having to travel. As one of the highest users of Telehealth, the Cancer Agency increased its usage by more than 100 per cent between 2014-15 and 2015-16.

Telehealth Appointments	2014/15	2015/16
Allan Blair Cancer Centre appointments	1,059	2,175
Saskatoon Cancer Centre appointments	629	1,170
Number of kilometres saved in patient travel (provincial)	589,692	1,554,680

“Telehealth allows patients to stay closer to home, saving them countless hours of driving.” Livingstone remarked. “When our patients are less tired, have support from their friends, families and communities, their treatments and their outcomes are often better.”

Research

Research can have a profound impact on providing better health for Saskatchewan people. Research has helped develop better drug regimens and can also help identify specific screening or early detection programs that can reduce the prevalence of cancer.

All of the researchers and scientists at the Cancer Agency work hard each year securing grants from other institutions and organizations to ensure their work can continue. In May, Dr. Franco Vizeacoumar, a Cancer Agency research scientist, and co-applicant Dr. Brian Eames from the University of Saskatchewan were awarded the second largest Canadian Foundation for Innovation infrastructure grant in the amount of \$503,729. With matching funding from the Cancer Agency and the University of Saskatchewan the total grant amounts to \$1.26 million.

The grant was awarded to the researchers for a high throughput molecular imaging platform. The grant will allow for the purchase of a core imager and plate-handling system configured with a wide-field fluorescence microscope system capable of automated fluorescence image capture from 96 well and 384-well plates of cells.

Dr. Franco Vizeacoumar

The Heart of Our Work

Funds were also secured for a liquid handling robot, a mechanical bioreactor and an arrayed genome-wide human ribonucleic acid (RNA) interference (shRNA) library for systematic individual knockdown of each gene in the human genome.

This will enable high-throughput screens to be carried out to address a number of biological questions in the areas of cancer cell biology and osteoarthritis.

“We want to know what the pathways are that drive tumour formation – and to do this we need to build a roadmap,” explained Vizeacoumar in an article published by the College of Medicine. “Just like Google maps tell us which streets connect location A to B, and how we can intersect these pathways to selectively block them.”

The hope is that the map would then help in figuring out where the cellular mutation occurs that leads to the ‘turning-on’ of the cancer.

“If we can develop the hi-resolution maps, just like the street maps, then we’ll know who the ultimate culprit is,” Vizeacoumar continued. “(Then we) know where we have to target, and how we can kill the cancer cells alone.”

BETTER VALUE

Continuous Improvement

The Cancer Agency is committed to continuous improvement, not just to reduce costs but to improve safety, efficiency and the client, patient and family experience. An example of this in action was the rapid process improvement workshop (RPIW) that took place in the Cancer Agency phlebotomy area.

The demand for phlebotomy services had increased by 80 per cent over the last 10 years with an average of 172 blood draws each week. Unfortunately our processes had not changed with the increased volume and the Cancer Agency was doing a combination of taking appointments and allowing walk-ins. A team of staff began looking at how can we ensure that each patient gets their blood drawn in a timely way so that there are no waits and patient care is not delayed. Together with a patient working alongside staff, improvements have been made:

- Phlebotomy staff now print off a daily patient list and patients are called in by appointment time which has resulted in a more regular flow
- There is now a specific process for booking patients and a set number of spots available
- The doors to the area were removed and patients are now asked to remove their jackets before their appointment resulting in better flow and a 40 per cent reduction in set-up time
- The entire time it takes for a patient to register, have their blood drawn and have staff update the stats in the electronic medical record was reduced by nine minutes and 43 seconds.

Patients have expressed their approval of the new processes that have been put in place, and today they are no longer waiting for phlebotomy services at their scheduled appointment time.

Using RPIWs to make improvements is just one example of the way the Cancer Agency is making changes in how we deliver care for patients.

“This RPIW is an example of how little improvements can make a big difference to the overall flow of a space and can improve the patient’s experience in the process.”

–Scott Livingstone

The Heart of Our Work

Pan-Canadian Pharmaceutical Alliance

The cost of cancer care has grown over the last several years and there is an increase to the number of drugs that are becoming available for patient treatments. This year alone we introduced 15 new drug therapies. As an organization we are also spending \$59.5 million on drug therapies and medical supplies. That's 36.5 per cent of our total budget.

The pan-Canadian Pharmaceutical Alliance has been an immensely important component in trying to reduce the cost of drugs.

MOVING FROM MISSION TO ACTION

In 2015-16 the Cancer Agency celebrated 85 years of caring for people, and that takes on many different forms—research, population health, early detection and prevention, treatment, programs and services, building partnerships, continuous improvement and much more. It's the sum of the collective efforts of staff working together that makes a difference and that takes the organization from mission to action. It's the work of staff that this report highlights.

"No healthcare organization is without challenges, but we have faced them this year with grace, with a strong desire to improve, and always with people at the heart of how we made decisions. We will continue this path as we move into the second year of our strategic plan and look towards providing the very best in cancer control for Saskatchewan people."

"I feel we truly have the very best staff who are dedicated to their work and to the people of this province. They want to do better today than they did yesterday. It's their efforts that make me proud to be part of the Saskatchewan Cancer Agency."

—Scott Livingstone

Financial Summary

In 2015-16 the Saskatchewan Cancer Agency's Operating Fund received revenues of \$164.5 million and incurred expenditures of \$163.0 million resulting in an excess of revenues over expenses of \$1.5 million. The positive financial position was mainly the result of clinical staff vacancy savings related to timing of recruitment as well as higher than anticipated revenues and reductions in discretionary spending. As noted in the chart below, 90.0% of the Cancer Agency's operating expenditures in 2015-16 were on salaries, benefits, medical tests and drugs. In addition, the Cancer Agency administers a Capital Fund, Research Fund and Trust Fund. These restricted funds received revenues of \$1.8 million and incurred expenditures of \$5.9 million in 2015-16.

In 2015-16, the Cancer Agency funded five new drug programs and seven new indications for existing drugs. All but one new indication was reviewed and recommended by the pan-Canadian Oncology Drug Review (pCODR). These drugs were then negotiated at the pan-Canadian Pharmaceutical Alliance (pCPA), resulting in savings in drug costs. In addition, due to intense negotiations by the Cancer Agency for drugs that are now generic or soon to have competition from generic drugs, the drug rebates for 2015-16 were higher than anticipated. The cost sustainability strategy of national buying and negotiations is expected to continue in future years and expand into other areas, such as capital equipment.

As patients continue to live longer with cancer, the associated increase in staff workload and expansion of services is resulting in ongoing significant space pressures at our two cancer centres. In 2015-16, the Cancer Agency completed the consolidation and centralization of off-site staff into one location in the Harbour Landing Business Park. This also allowed more non-clinical staff to move to this new location and out of the Allan Blair Cancer Centre, making more space available at the cancer centre for treatments and for clinic staff providing direct patient care. Planning for a renovation of the third floor of the Saskatoon Cancer Centre also began in 2015-16. This space, formerly occupied by the research department until their move to the University of Saskatchewan's Academic Health Sciences Building, will be utilized mainly for patient chemotherapy treatments.

Advances in cancer treatments and technology continue to emerge, which creates pressure to acquire new equipment. The annual planning process for capital equipment helps us to identify the highest priority areas for allocation of capital funding and to communicate funding needs to the Ministry of Health. One of the strategic priorities that got underway in 2015-16 is the creation of a multi-year capital plan which will be updated annually and used for planning purposes. This will allow us to more effectively communicate our longer-term capital equipment needs to the Ministry of Health and other stakeholders on a regular basis.

In 2015-16, we continued with the renovations necessary to accommodate a fourth linear accelerator at the Allan Blair Cancer Centre, with the completion of the renovations and the delivery of the new machine scheduled in the 2016-17 fiscal year. As well, equipment was purchased for a new program offering stereotactic radiosurgery (SRS) at the Saskatoon Cancer Centre. This recently implemented program is allowing patients to receive SRS treatments in Saskatchewan for the first time, eliminating the need for them to travel to another province for these treatments.

Management Report

The accompanying financial statements are the responsibility of management and are approved by the Saskatchewan Cancer Agency Board of Directors. The financial statements have been prepared in accordance with Canadian Public Sector Accounting Standards and the Financial Reporting Guide issued by Saskatchewan Health, and of necessity include amounts based on estimates and judgments. The financial information presented in the annual report is consistent with the financial statements.

Management maintains appropriate systems of internal control, including policies and procedures, which provide reasonable assurance that the Cancer Agency's assets are safeguarded and the financial records are relevant and reliable.

The Saskatchewan Cancer Agency Board of Directors delegates the responsibility of reviewing the financial statements and overseeing management's performance in financial reporting to the Audit Committee of the board. The Audit Committee meets with management to discuss and review financial matters and recommends the financial statements to the Cancer Agency for approval. The Cancer Agency approves the annual report and, with the recommendation of the Audit Committee, approves the financial statements.

The appointed auditor conducts an independent audit of the financial statements and has full and open access to the Audit Committee. The auditor's report expresses an opinion on the fairness of the financial statements prepared by management.

Independent Auditor's Report

PROVINCIAL AUDITOR
of Saskatchewan

INDEPENDENT AUDITOR'S REPORT

To: The Members of the Legislative Assembly of Saskatchewan

I have audited the accompanying financial statements of the Saskatchewan Cancer Agency, which comprise the statement of financial position as at March 31, 2016, and the statement of operations, statement of changes in fund balances and statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian public sector accounting standards for government not-for-profit organizations, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

My responsibility is to express an opinion on these financial statements based on my audit. I conducted my audit in accordance with Canadian generally accepted auditing standards. Those standards require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

Opinion

In my opinion, the financial statements present fairly, in all material respects, the financial position of the Saskatchewan Cancer Agency as at March 31, 2016, and the results of its operations and cash flows for the year then ended in accordance with Canadian public sector accounting standards for government not-for-profit organizations.

Judy Ferguson, FCPA, FCA
Provincial Auditor

2015-16 Financial Statements

SASKATCHEWAN CANCER AGENCY NOTES TO THE FINANCIAL STATEMENTS As at March 31, 2016

1. Legislative Authority

The Saskatchewan Cancer Foundation commenced operations on August 1, 1979 under the provisions of *The Cancer Foundation Act*. Effective January 2, 2007, it continued as a corporation under the name of the Saskatchewan Cancer Agency (Cancer Agency), pursuant to *The Cancer Agency Act*. The Cancer Agency is responsible for the planning, organization, delivery and evaluation of cancer care services throughout Saskatchewan in collaboration with Saskatchewan regional health authorities and health care organizations.

The Cancer Agency is a not-for-profit organization and is not subject to income and property taxes from the federal, provincial and municipal levels of government.

2. Significant Accounting Policies

The Cancer Agency is classified as a government not-for-profit organization. These financial statements have been prepared in accordance with Canadian public sector accounting (PSA) standards, issued by the Public Sector Accounting Board and published by the Chartered Professional Accountants of Canada (CPA Canada). The Cancer Agency has adopted the standards for government not-for-profit organizations, as set forth at PSA Handbook Section PS 4200 to PS 4270.

a) Fund Accounting

The accounts of the Cancer Agency are maintained in accordance with the restricted fund method of accounting. For financial reporting purposes, accounts with similar characteristics have been combined into the following major funds:

i) Operating Fund

The Operating Fund reflects the primary operations of the Cancer Agency including contributions from the Ministry of Health - General Revenue Fund for the provision of health services. Other revenues consist of recoveries, ancillary revenue and billings to patients and other organizations.

ii) Capital Fund

The Capital Fund is a restricted fund that reflects the equity of the Cancer Agency in capital assets. The Capital Fund includes contributions from the Ministry of Health - General Revenue Fund designated for construction of capital projects and the acquisition of capital equipment. Expenses consist primarily of amortization of capital assets.

iii) Research Fund

The Research Fund is a restricted fund that supports the awarding of cancer research grants. The Research Fund includes contributions from research donations transferred from the Trust Fund and investment income of the Research Fund.

iv) Trust Fund

The Trust Fund is a restricted fund that accepts donations and contributions designated by the contributors to be used for such purposes as cancer research, equipment and library books. The Cancer Agency maintains a record of the funds contributed and spent for each of the designated purposes until such funds are fully utilized. Trust funds are managed under four principles – Transparency, Accountability, Stewardship and Controls on Authorization.

2015-16 Financial Statements

b) Revenue

Unrestricted contributions are recognized as revenue in the Operating Fund in the year received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Restricted contributions related to general operations are recorded as deferred revenue and recognized as revenue of the Operating Fund in the year in which the related expenses are incurred. All other restricted contributions are recognized in the year as revenue of the appropriate restricted fund received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

c) Investments

Long-term investments are recorded at par value plus or minus the amortization of premium or discount remaining in the life of the bond. Short-term investments are recorded at fair value.

d) Inventory

Inventory consists of chemotherapy drugs valued at cost as determined using the average cost method.

e) Tangible Capital Assets

Tangible capital assets are recorded at cost. Normal maintenance and repairs are expensed as incurred. Tangible capital assets, with a life exceeding one year, are amortized on a straight-line basis over their estimated useful lives as follows:

Buildings	20 years
Leasehold improvements	3-20 years
Equipment and furniture	4-15 years

Donated tangible capital assets are recorded at their fair value at the date of contribution if readily determinable, otherwise they are recorded at nominal value.

f) Employee Future Benefits

i. Pension plan:

Employees of the Cancer Agency participate in a multi-employer defined benefit pension plan or a multi-employer defined contribution plan. The Cancer Agency follows defined contribution plan accounting for its participation in these plans. Accordingly, the Cancer Agency expenses all contributions it is required to make in the year.

ii. Disability income plan:

Out-of-scope employees of the Cancer Agency participate in a disability income plan to provide wage-loss insurance due to a disability. The Cancer Agency follows post-employment benefits accounting for its participation in the plans. Accordingly, the Cancer Agency expenses all contributions it is required to make in the year. In-scope employees of the Cancer Agency also participate in a disability income plan to provide wage-loss insurance due to a disability. This plan is administered through the Saskatchewan Government and General Employees' Union and the Cancer Agency has no financial obligation for the plan.

iii. Accumulated sick leave benefit liability:

The Cancer Agency provides sick leave benefits for employees that accumulate but do not vest. The Cancer Agency recognizes a liability and an expense for sick leave in the period in which employees render services in return for the benefits. The liability and expense is developed using an actuarial cost method.

2015-16 Financial Statements

g) Measurement Uncertainty

These financial statements have been prepared by management in accordance with Canadian generally accepted accounting principles. In the preparation of financial statements, management makes various estimates and assumptions in determining the reported amounts of assets and liabilities, revenues and expenses, and in the disclosure of commitments and contingencies. Changes in estimates and assumptions will occur based on the passage of time and the occurrence of certain future events. The changes will be reported in the period in which they become known. Significant items subject to such estimates and assumptions include the accrual of payroll and benefit costs and accrual of costs for services provided by regional health authorities.

h) Financial Instruments

Cash, short-term investments, accounts receivable, accounts payable, accrued salaries and vacation payable are classified in the fair value category. Gains and losses on these financial instruments are recognized in the Statement of Operations.

Financial assets in the fair value category are marked-to-market by reference to their quoted bid price.

Long-term investments are valued at par value plus or minus the amortization of premium or discount remaining in the life of the bond. Sales and purchases of investments are recorded on the trade date. Investments consist of guaranteed investment certificates, term deposits, bonds and debentures. Transaction costs related to the acquisition of investments are expensed.

As at March 31, 2016 (2015 – none), the Cancer Agency does not have any outstanding contracts or financial instruments with embedded derivatives. Financial assets are categorized as level 1 in the fair value hierarchy.

3. Net Change in Non-Cash Working Capital

	Operating Fund		Restricted Funds				
	2016	2015	Capital Fund	Research Fund	Trust Fund	Total 2016	Total 2015

Work in progress amount included in the assets above is \$1,190,378 (2015 - \$3,496,383). This amount was not amortized in 2015/16.

2015-16 Financial Statements

5. Contractual Obligations

a) Capital Assets Acquisitions

At March 31, 2016, contractual obligations for acquisition of capital assets are \$3,181,143 (2015 - \$3,244,199).

b) Operating Leases

Minimum annual payments under operating leases on property over the next five years are as follows:

2017	\$1,733,672
2018	1,764,978
2019	1,676,819
2020	1,614,663
2021	1,634,173

c) Contracted Health Services Operators

The Cancer Agency continues to contract on an ongoing basis with the regional health authorities to provide some services such as lab tests, diagnostic radiology, and housekeeping and maintenance services. Services provided in the year ending March 31, 2016 will continue to be contracted for the following fiscal year. In the year ended March 31, 2016, the Cancer Agency contracted services amounting to \$7,761,079 (2015 - \$7,109,139). Note 10 provides supplementary information on the regional health authorities.

6. Cancer Patient Lodges

The Canadian Cancer Society, Saskatchewan Division (Society), previously donated two cancer patient lodges in the Province to the Cancer Agency. Under the terms of an agreement with the Society, the Cancer Agency has assumed responsibility for the operations of these lodges. Title to the properties will remain with the Cancer Agency so long as they are operated as cancer patient lodges. If the Cancer Agency ceases to use the buildings as patient lodges, title of those buildings will be transferred to the Society without charge.

7. Deferred Revenue

As at March 31, 2016	Balance Beginning of Year	Less Amount Recognized	Add Amount Received	Balance End of Year
Ministry of Health Initiatives				
Ministry of Health - General Revenue Fund

2015-16 Financial Statements

8. Interfund Transfers

Each year the Cancer Agency transfers amounts between its funds for various purposes. These include funding current and future capital asset purchases, research grants and reassigning fund balances to support certain activities.

	2016			
	Operating Fund	Capital Fund	Research Fund	Trust Fund
Capital asset purchases	\$ ---	\$ 653,995	\$ ---	\$ (653,995)
Research grants	---	---	466,737	(466,737)
Total	\$ ---	\$ 653,995	\$ 466,737	\$ (1,120,732)

	2015			
	Operating Fund	Capital Fund	Research Fund	Trust Fund
Capital asset purchases	\$ (6,700,000)	\$ 6,918,057	\$ ---	\$ (218,057)
Research grants	(500,000)	---	1,185,492	(685,492)
Total	\$ (7,200,000)	\$ 6,918,057	\$ 1,185,492	\$ (903,549)

9. Employer Future Benefits

a) Pension Plan

Employees of the Cancer Agency participate in one of the following pension plans:

1. Public Employees Pension Plan (PEPP) (a related party) is a defined contribution pension plan. The Province of Saskatchewan is responsible for the plan. The Cancer Agency's financial obligation to the plan is limited to making required payments to match the amount contributed by the employees for current services. Pension expense for the year is included in salaries and employee benefits in Schedule 5.
2. Saskatchewan Healthcare Employees' Pension Plan (SHEPP) is jointly governed by a board of eight trustees. Four of the trustees are appointed by Health Shared Services Saskatchewan (3sHealth) (a related party) and four of the trustees are appointed by Saskatchewan's health care unions (CUPE, SUN, SEIU, SGEU, RWDSU and HSAS). SHEPP is a multi-employer defined benefit plan, which came into effect December 31, 2002. The Cancer Agency's financial obligation to the plan is limited to making required payments to match the amount contributed by the employees for current services at a ratio of 1.12 to 1. Pension plan contribution rates have increased as a result of deficiencies in SHEPP. Any actuarially determined deficiency is the responsibility of participating employers and employees in the ratio of 1.12 to 1. Contribution rates will continue to increase until the next actuarial reports are completed. Pension expense for the year is included in salaries and employee benefits in Schedule 5.

2015-16 Financial Statements

			2016	2015
	SHEPP	PEPP	Total	Total
Number of active members	62	690	752	739
Member contribution rate, percentage of salary	7.7% - 10%	7.25%		
Cancer Agency contribution rate, percentage of salary	8.62% - 11.2%	7.25%		
Member contributions (thousands of dollars)	\$ 357	\$ 3,461	\$ 3,818	\$ 3,641
Cancer Agency contributions (thousands of dollars)	\$ 399	\$ 3,533	\$ 3,932	\$ 3,725

Note - Active members are employees of the Cancer Agency, including those on leave of absence as of March 31, 2016. Inactive members are not reported by the Agency.

b) Disability Income Plans

Employees of the Cancer Agency participate in the following disability income plans:

PEBA – Disability income plan for out-of-scope staff, administered by the Public Employees Benefits Agency. The Cancer Agency's financial obligation to this plan is limited to making the required payments to the plan according to the applicable agreement. Disability expense for the PEBA plan is included in salaries and employee benefits in Schedule 5 and is equal to the contribution amount below.

SGEU – Disability income plan for in-scope staff, administered by the Saskatchewan Government and General Employees' Union. The Cancer Agency has no financial obligation for this plan.

			2016	2015
	PEBA	SGEU	Total	Total
Number of active members	139	664	803	785
Member contribution rate, percentage of salary	0.97%	1.30%		
Cancer Agency contribution rate, percentage of salary	1.12%	0.00%		
Member contributions (thousands of dollars)	\$ 225	\$ 450	\$ 675	\$ 643
Cancer Agency contributions (thousands of dollars)	\$ 274	\$ -	\$ 274	\$ 263

c) Accumulated Sick Leave Benefit Liability

The cost of the accrued benefit obligations related to sick leave entitlement earned by employees is actuarially determined using the projected benefit method prorated on service and management's best estimate of inflation, discount rate, employee demographics and sick leave usage of active employees. The Cancer Agency has completed an actuarial valuation as of March 31, 2016. Key assumptions used as inputs into the actuarial calculation are as follows:

	2016	2015
Discount rate (per annum)	2.40%	1.90%
Percentage earnings increase (per annum)		
For ages 15 to 29	2.00%	2.00%
For ages 30 to 39	1.50%	1.50%
For ages 40 to 49	1.00%	1.00%
For ages 50 to 59	0.50%	0.50%
For ages 60 and over	0.00%	0.00%
Termination rates (sample rates)		
Age 20	0.119	0.119
Age 25	0.084	0.084
Age 30	0.056	0.056
Age 35	0.045	0.045
Age 40	0.035	0.035
Age 45	0.030	0.030
Age 50	0.025	0.025
Age 55	0.015	0.015
Age 60	0.010	0.010

2015-16 Financial Statements

	2016	2015
Accrued benefit obligation, beginning of year	\$ 2,291,100	\$ 2,194,500
Cost for the year		
Interest Expense	48,600	65,400
Benefits Expense	380,200	340,400
Benefits paid during the year	(307,000)	(309,200)
Accrued benefit obligation, end of year	\$ 2,412,900	\$ 2,291,100

10. Related Party Transactions

These financial statements include transactions with related parties. The Cancer Agency is related to all Saskatchewan Crown Agencies such as ministries, corporations, boards and commissions under the common control of the Government of Saskatchewan. The Cancer Agency is also related to non-Crown enterprises that the Government jointly controls or significantly influences.

Transactions with these related parties are in the normal course of operations. Amounts due to or from and the recorded amounts of transactions resulting from these transactions are included in the financial statements and the table below. Drugs and purchased hospital services acquired from related parties are recorded at rates agreed to by the related parties.

Other routine operating transactions with related parties are recorded at agreed upon rates charged by those organizations and are settled on normal trade terms.

	2016	2015
Expenses		
Regina Qu'Appelle Regional Health Authority	\$ 2,739,751	\$ 2,408,828
Saskatoon Regional Health Authority	4,389,161	4,230,465
Public Employees Pension Plan	3,532,778	3,362,689
3sHealth	2,061,136	2,131,639
Other related parties	3,988,380	5,220,865
Total related party expenses	\$ 16,711,206	\$ 17,354,486
Prepaid Expenses		
Other related parties	\$ ---	\$ 165,875
Total related party prepaid expenses	\$ ---	\$ 165,875
Accounts Payable		
Regina Qu'Appelle Regional Health Authority	\$ 1,004,101	\$ 437,699
Saskatoon Regional Health Authority	718,956	784,135
Other related parties	576,518	492,943
Total related party payable	\$ 2,299,575	\$ 1,714,777

In addition, the Cancer Agency pays Provincial Sales Tax to the Saskatchewan Ministry of Finance on all its taxable purchases. Taxes paid are recorded as part of the cost of those purchases.

The building premises occupied by the Allan Blair Cancer Centre are leased from the Regina Qu'Appelle Regional Health Authority for \$1 per year, including a portion of occupancy costs. The Saskatoon Cancer Centre building owned by the Cancer Agency is situated on land owned by the University of Saskatchewan. The Cancer Agency is not charged for the use of this land.

2015-16 Financial Statements

11. Financial Instruments

a) Significant Terms and Conditions

There are no significant terms and conditions related to financial instruments classified as current assets or current liabilities that may affect the amount, timing and certainty of future cash flows. Significant terms and conditions for other financial instruments are disclosed separately in these financial statements.

b) Financial Risk Management

The Board ensures that the Cancer Agency has identified its major risks and ensures that management monitors and controls them. The Board oversees the Cancer Agency's systems and practices of internal control and ensures that these controls contribute to the assessment and mitigation of risk.

The Cancer Agency has exposure to the following risk from its use of financial instruments: credit risk, market risk and liquidity risk.

c) Credit Risk

The Cancer Agency is exposed to credit risk from potential non-payment of accounts receivable. The majority of the Cancer Agency's receivables are from Saskatchewan Health – General Revenue Fund, other government organizations or suppliers with which the Cancer Agency has ongoing contractual relations. The Cancer Agency is also exposed to credit risk from cash, short-term investments and investments.

The carrying amount of financial assets represents the maximum credit exposure as follows:

	2016	2015
Cash and short-term investments	\$ 16,539,881	\$ 18,835,417
Accounts receivable		
Ministry of Health – General Revenue Fund	477,607	287,500
Other	3,882,036	3,013,949
Investments	4,327,598	5,852,096
	\$ 25,227,122	\$ 27,988,962

The Cancer Agency manages its credit risk surrounding cash and short-term investments by dealing solely with reputable banks and financial institutions and using an investment policy to guide their investment decisions. The Cancer Agency invests surplus funds to earn investment income with the objective of maintaining safety of principal and providing adequate liquidity to meet cash flow requirements.

d) Market Risk

Market risk is the risk that market prices, such as foreign exchange rates or interest rates, will affect the Cancer Agency's income or the value of its holdings of financial instruments. The objective of market risk management is to control market risk exposures within acceptable parameters while optimizing return on investment.

(i) Foreign exchange risk:

The Cancer Agency operates within Canada, but in the normal course of operations is party to transactions denominated in foreign currencies. Foreign exchange risk arises from transactions denominated in a currency other than the Canadian dollar, which is the functional currency of the Cancer Agency. The Cancer Agency believes that it is not subject to significant foreign exchange risk from its financial instruments.

(ii) Interest rate risk:

Interest rate risk is the risk that the fair value of future cash flows or a financial instrument will fluctuate because of changes in the market interest rates.

2015-16 Financial Statements

Financial assets and financial liabilities with variable interest rates expose the Cancer Agency to cash flow interest rate risk. The Cancer Agency's investments include guaranteed investment certificates and long-term bonds bearing interest at coupon rates.

Although management monitors exposure to interest rate fluctuations, it does not employ any interest rate management policies to counteract interest rate fluctuations.

As of March 31, 2016, had prevailing interest rates increased or decreased by 1%, assuming a parallel shift in the yield curve, with all other variables held constant, the Cancer Agency's financial instruments would have decreased or increased by approximately \$252,271 (2015 - \$278,890), approximately 5.8% of the value of investments (2015 - 4.8%).

(iii) Liquidity risk:

Liquidity risk is the risk that the Cancer Agency will not be able to meet its financial obligations as they become due. The Cancer Agency manages liquidity risk by continually monitoring actual and forecasted cash flows from operations and from anticipated investing and financing activities.

At March 31, 2016, the Cancer Agency has a cash balance of \$16,539,881 (2015 - \$18,835,417).

(iv) Fair value:

The following methods and assumptions were used to estimate the fair value of each class of financial instrument:

- The carrying amounts of these financial instruments approximate fair value due to their immediate or short-term nature.
 - Accounts receivable
 - Accounts payable
 - Accrued salaries and vacation payable
- Cash and short-term investments are recorded at fair value as disclosed in Schedule 1, determined using quoted market prices.
- Long-term investments are recorded at par value plus or minus the amortization of premium or discount remaining in the life of the bond, as disclosed in Schedule 1.

Determination of fair value:

When the carrying amount of a financial instrument is the most reasonable approximation of fair value, reference to market quotations and estimation techniques is not required. The carrying values of cash and short-term investments, accounts receivable and accounts payable approximated their fair values due to the short-term maturity of these financial instruments.

12. Budget

Schedule 5 compares actual results to the 2015-16 budget plan approved by the Cancer Agency's Board of Directors on May 20, 2015.

13. Pay for Performance

As part of government-wide fiscal restraint measures, the pay for performance compensation plan has been suspended for the fiscal years 2014-15 to 2016-17. This compensation plan was introduced in April 2011 and allowed senior employees to be eligible to earn lump sum performance adjustments of up to 110% of their base salary. In prior years, senior employees were paid 90% of current base salary and lump sum performance adjustments related to the previous year. Due to the suspension of the pay for performance compensation plan, senior employees will receive 100% of their base salary for the fiscal years 2014-15 to 2016-17.

2015-16 Financial Statements

14. Collective Bargaining Agreement

The Saskatchewan Government and General Employees' Union (SGEU) collective bargaining agreement was ratified during 2015-16 and all associated costs are included in these financial statements. The agreement expires on March 31, 2018.
