

Scan for the electronic copy of this document with embedded links or go to the following webpage:

http://www.saskcancer.ca/images/pdfs/screening/Cervical/SPCC_Checklist_2023_Cervical_Guidelines.pdf

Read the Cervical Cancer Screening Clinical Practice Guideline 2023.

To read the guidelines before they go into effect [click here](#) or scan here.

✓ Once the new guidelines have gone into effect, they will replace the old guidelines [here](#).

Additional communication about the date the guidelines go into effect will be coming soon.

Review the [guidelines transition resource](#) and review your current patients.

This resource will help you to navigate through specific patient situations which may occur during the transition to the new guidelines. These include:

- Transitioning patients on 1 or 2 year screening to 3 year interval screening
- Transitioning patients in abnormal result follow-up
- Transitioning patients 24 years and under

Health-care providers are required to review some patients' screening needs based on the new guidelines. Review this resource to determine which patients you need to review, and to find abnormal result follow-up pathways through these transition points.

Register for optional learning opportunities

[CME Cervical Cancer Screening Online Course: Implementing the 2023 Guidelines](#)

The Saskatchewan Cancer Agency, the Department of Obstetrics and Gynecology, and the Division of Continuing Medical Education, College of Medicine collaborated to provide a learning opportunity for practitioners. Continuous Intake Course Cost: FREE

Other events

Review the events calendar on the Screening Program for Cervical Cancer's health-care provider resource website, and register for any other events that fit your learning needs.

Utilize practice resources

The Screening Program for Cervical Cancer offers a variety of resources for health-care providers and members of the public. The SPCC is continuing to expand the resources available and the languages available for public resources.

Participants' Resources

✓ Refer people to the following resources available on the [SPCC Client Cervical Screening Resources webpage](#)

- [A Pap test can save your life pamphlet](#)
- [Understanding your cervical screening test results pamphlet \(Pap\)](#)
- [Understanding your cervical screening results: Pap and HPV test results pamphlet](#)
- [Cervical screening is improving poster](#)
- [What do these changes mean to me poster](#)
- [How is my Pap test changing? booklet](#)
- [I'm HPV positive handout](#)

Health-Care Providers' Resources

✓ Refer to the following resources available on the [SPCC Health-Care Provider Resources webpage](#)

- [Cervical Cancer Screening Summary of Clinical Practice Guideline](#)
- [FAQs and Decision Points for Initiating and Discontinuing Pap Testing](#)
- [Follow-up for Abnormal Pap Test Algorithm](#)
- [HPV Reflex Information for Health-Care Providers](#)
- Cervical Cancer Screening Quick Reference
- Screening After Hysterectomy
- Cervical Cancer Screening Clinical Practice Guidelines - An Interdisciplinary Practitioner Review video
- [Cervical Health Resources for HCPs and Pts](#)
- [Cervical Health Resources Tool](#)

Order more laminated resources

Scan here or [click here](#) to order more laminated resources to be mailed to your clinic for FREE.
