

## Discharge Pathway for Low-grade Neuroendocrine Tumours April 2021

1. All metastatic disease patients with active disease will be followed up at the cancer centre. Patients with completely resected metastatic disease can be discharged to their primary care provider after five years of follow up at the cancer centre.
2. All patients with carcinoid syndrome will be followed up at the cancer centre.
3. Grade II and above tumours in remission will be followed up at the cancer centre for total of five years.
4. All other non-metastatic completely resected patients with low grade NET can be discharged from the cancer centre with surveillance guidelines.
